SUSTAINABILITY AT marinaforum REGENSBURG

Tradition goes **GREEN** future: We have maintained a consistent focus in sustainability right from the design stage of the marinaforum Regensburg. Not only do we want you to hold meetings and events at the marinaforum Regensburg, the sustainable events centre, but are also on hand to assist with our **Green Score Card** service for your sustainable event. Further information overleaf.

MEETINGS AT THE SUSTAINABLE EVENTS CENTRE

SOME OF THE HIGHLIGHTS:

- + BREEAM-certified in building and operation with "very good"
- + Use of a heritage-listed building
- + Special, resource-saving ceiling construction, "Zollinger ceiling" visible from afar
- + Low-emission power: Heating, cooling with groundwater, no cooling unit, eco-generated operating current
- + Groundwater heating pumps operate with renewable energy, redundant power via local heating plant
- + LED lighting
- + Compliance with the EnEV 2012/2013 despite monument protection
- + Transport: Walking distance from old town, bike parking bays, e-vehicle charging stations, excellent public transport access, free parking for carpoolers
- + Barrier-free
- + Built based on the needs of future users
- + Co-operation with regional partners, cultural and regional identity

Winner of the ADAC Bavarian Tourism Award, the 2019 Special Sustainability Prize for the "Comprehensive Sustainability Concept for the MICE Destination of Regensburg". You choose how sustainable you want your event to be! Regensburg Tourismus GmbH (RTG) will assist you with its two-pillar system for the organization, communications, evaluation, and rating of your event.

GREEN SCORE CARD

Using the Green Score Card, we can work together to create your customized mix from over 200 sustainable measures for aspects such as mobility, catering, venue, accommodation etc. In doing so, we place great emphasis on giving equal weight to the economic, environmental and social dimensions of sustainability. A Green Note, and potentially a certificate and other communication elements, can be used to highlight the notion of sustainability during the event, and enable it to be used for reports.
